Dear Ben Settle,

I have sent you this important notification to inform you of a new air purifier unlike anything on the market.

The EdenPURE™ is the best and most advanced air purifier on the market.

It runs super quiet and requires no filter replacement.

Unlike typical air purifiers which have only 1 or 2 mechanisms of eliminating pollution, the EdenPURE™ has 4 mechanisms which eliminate pollution.

There are many different types of pollution and many of them, especially the worst, cannot be eliminated with the limited mechanisms of old-style air purifiers. The EdenPURE™ 4-mechanism system destroys all of the types of pollution.

The remarkable EdenPURE™ not only eliminates pollution from the air, but also eliminates pollution embedded in walls, ceilings, floors, carpets, furniture, clothing, and on countertops and other surfaces. It sanitizes everything in the house. The majority of air pollution comes from contaminated surfaces and fabrics.

The EdenPURE™ relieves allergies, asthma, respiratory problems, provides better sleep, more energy, and better health.

The air purification technology in the EdenPURE™ is that used by the federal government to purify air in the Space Shuttle and the International Space Station.

Old style HEPA filters mainly only remove dust and some allergens. They do not remove the most harmful pollutants such as bacteria, viruses, mold and yeast.

And if you have one of those air purifiers that has no fan, beware. More will be explained on this as you read on.

The EdenPURE™ has a super advanced fan that runs so quiet that you would have to put your ear up next to it to know that it's even running. And the EdenPURE™ is virtually maintenance free.

BioTech Research has been in the air purification business for a long time and our previous model was an all-
